

# BALANCED (MODERATE RISK) EUR

## MODEL PORTFOLIO

### QUARTERLY FACTSHEET

31 August 2024

### Objective and Investment Policy

The model portfolio aims to achieve long-term capital growth through diversified exposure to various asset classes and market sectors. It invests in energy ETFs for sector-specific growth, small-cap company ETFs for higher-risk, high-reward opportunities, and large-cap ETFs for stability and steady returns. Precious metals ETFs provide inflation hedging and portfolio diversification. A managed futures ETF offers exposure to alternative strategies, enhancing risk-adjusted returns. The portfolio maintains a balanced risk profile, aiming for moderate to high growth with controlled volatility.

### Target Asset Allocation
